

Municipal Aquatic Center & Waterpark Portfolio

Key Facts about OpenAire

We build in 100% ALUMINUM this means:

- No more corrosion
- No more repainting your building
- No more painting shutdowns

We can span 190 ft without columns.

- Need a wider building? We simply add a line of columns
- Domes can be 300ft diameter
- Minimum L/200 deflection criteria in every design

We engineer for the climate

- Snow, Rain, Earthquakes, Hurricanes, Tornados
- All of our buildings are custom engineered for the location

We help you save Energy

- Opening the roof cuts down on energy use by up to 25%
- Opening the roof means less (or zero) investment on mechanical cooling

We turn dark venues into bright spaces

- A translucent polycarbonate roof means no need for lighting in the daytime
- An open bright space means guests want to visit year round improving your ROI

Guests LOVE photos in the spaces we create - so does your SOCIAL MEDIA

We build cleaner, healthier venues

A corrosion free building is easier to clean and operate
This is critical to reduce transmission of illness between guests

We join projects during Concept or SD design phases

Bringing OpenAire onto the team early in the design reduces change orders
OpenAire already works with many of the largest architecture, design and engineering agencies as well as the biggest construction and contracting firms

**Our buildings are
PROVEN TO COST LESS
to Operate!**
